Aman Singh Bora

+91-9756258097 | amanbora9759345011@gmail.com | linkedin.com/in/amxnn05 | amxnn05.vercel.app

Objective

Software Engineer with hands-on experience in full-stack development and AI-driven applications, specializing in building scalable and real-time systems. Proficient in the MERN stack with a strong focus on backend architecture, frontend and performance optimization. Experienced in integrating AI models and modern APIs to deliver intelligent, user-centric solutions. Seeking a full-time role to contribute to high-impact engineering teams.

Technical Skills

Frameworks: Node.js, Express.js
Libraries: React.js
Database: MongoDB
Programming Languages: JavaScript, TypeScript, Python, C++
Tools & Platforms: Git, GitHub, Docker, Linux/Unix

Projects

Genin Ai *Personal Project*

- Developed an AI-powered search engine that integrates real-time web search with LLMs to deliver grounded, source-cited answers.
- Developed high-performance full-stack architecture using Bun, React, and TypeScript for low-latency, streaming AI responses.
- Integrated high-speed inference engines (Groq) and search APIs (Tavily) to deliver sub-second, web-grounded responses.
- Engineered prompt orchestration and follow-up suggestion logic to enhance conversation depth and AI accuracy.
- Implemented secure OAuth authentication and protected routes to manage multi-user access and secure session state.

Real-Time Video Chat Platform *Personal Project*

- Architected and deployed a full-stack random video chat application using React, TypeScript, Node.js, and WebRTC, achieving peer-to-peer video and audio streaming with near-zero latency across 100% of test sessions.
- Engineered a Socket.IO matchmaking engine to dynamically pair random users and manage the full connection lifecycle, reducing connection setup time by eliminating manual pairing logic.
- Integrated NSFW.js machine learning model for real-time automated content moderation, detecting and blocking inappropriate video content and improving platform safety with zero manual review overhead.

SimplyExim – Export/Import Company Website *Remote / Freelance*

- Developed a fully responsive professional business website for an export-import company using React.js, delivering a clean, mobile-first UI with reusable components for services, product listings, and company information pages.
- Implemented seamless client-side routing with React Router, enabling smooth multi-page navigation and improving average page transition experience for end users.
- Deployed the production application on Hostinger, ensuring global fast load times, and 99.9% uptime availability for the client's business platform.

Education

Soban Singh Jeena University *July 2023 – July 2026*
Bachelor of Science in Information Technology *Almora, Uttrakhand, India*

Extra-Curricular Activities

- Actively contribute and maintain projects on GitHub, including full-stack applications built using the MERN stack.
- Daily user of Linux (Arch-based environment), managing system configuration, package management, and performance tuning.
- Continuously learning and exploring Artificial Intelligence, with a focus on neural networks and large language models (LLMs), including their architecture, training processes, and real-world applications.
