Aman Singh Bora

Full Stack Developer — MERN Stack — React — Node.js — WebRTC — REST APIs

+91-9756258097 | amanbora9759345011@gmail.com | linkedin.com/in/amxnn05 | amxnn05.vercel.app

Professional Summary

Results-driven Full Stack Developer with hands-on experience building responsive, real-time web applications using the MERN stack (MongoDB, Express.js, React, Node.js). Demonstrated ability to deliver production-ready solutions integrating WebRTC, Socket.IO, and machine learning APIs for complex interactive platforms. Adept at designing scalable backend architectures and crafting clean, accessible front-end interfaces optimized for performance and user experience.

Technical Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, React Router
Backend: Node.js, Express.js, REST APIs, Socket.IO, WebRTC
Database: MongoDB
Programming Languages: JavaScript, TypeScript, Python, C++
Tools & Platforms: Git, GitHub, Docker, Vercel, Linux/Unix

Professional Experience

Full Stack Developer (Project) *2024 – Present*
Real-Time Video Chat Platform *Remote / Personal Project*

- Architected and deployed a full-stack random video chat application using React, TypeScript, Node.js, and WebRTC, achieving peer-to-peer video and audio streaming with near-zero latency across 100% of test sessions.
- Engineered a Socket.IO matchmaking engine to dynamically pair random users and manage the full connection lifecycle, reducing connection setup time by eliminating manual pairing logic.
- Integrated NSFW.js machine learning model for real-time automated content moderation, detecting and blocking inappropriate video content and improving platform safety with zero manual review overhead.

Frontend Developer (Project) *2024*
SimplyExim – Export/Import Company Website *Remote / Freelance*

- Developed a fully responsive professional business website for an export-import company using React.js, delivering a clean, mobile-first UI with reusable components for services, product listings, and company information pages.
- Implemented seamless client-side routing with React Router, enabling smooth multi-page navigation and improving average page transition experience for end users.
- Deployed the production application on Vercel, ensuring global CDN distribution, fast load times, and 99.9% uptime availability for the client's business platform.

Education

Khatima Institute of Technology & Management *July 2023 – July 2026*
Bachelor of Science in Information Technology *Noida, Uttar Pradesh, India*
